

Melford Terminal and SAIC Canada Form Partnership

For Immediate Release

November 26, 2007

Halifax, NS – Melford International Terminal Inc. (MITI) has awarded a contract to SAIC Canada to provide state-of-the-art security and consequence management support and training for the new container terminal to be built at Melford, Guysborough County, Nova Scotia.

SAIC will supply a qualified and experienced team of security and consequence management specialists with a wide and diverse range of capabilities including security analysis, training needs assessment, special operations support and security management. Safety, security and operating technologies as part of a comprehensive solution to enhance security and operations will also be developed and/or integrated by SAIC.

MITI President Paul Martin said, “We are pleased and excited to have SAIC a part of our team. They are one of the largest science and technology contractors to the Canadian and US Governments, conducting leading-edge research and development of new technologies in areas such as national security.” He added, “We have stated from the outset of this project that we would strive to develop one of the lowest-cost, most secure and efficient terminals in North America and with SAIC as a partner we are on the right track.”

SAIC Canada’s Senior Project Manager Jim Bruce said, “We are pleased to be working with Melford International Terminal Inc. on this important container terminal project. The current global threat makes it imperative for port facilities to enhance security measures and emergency preparedness to support the efficient management of the port. We are proud to be part of the team.”

About SAIC – SAIC Canada is a wholly owned subsidiary of Science Applications International Corporation (NYSE:SAI), a leading systems, solutions and technical services company with approximately 44,000 employees in more than 150 cities worldwide. SAIC revenues increased from \$7.8 billion to \$8.3 billion in 2006.

About Melford International Terminal Inc. – Melford International Terminal Inc. is a Nova Scotia company that is developing a container terminal, rail intermodal facility and logistics park at Melford, Guysborough County on the Strait of Canso. Melford Terminal intends to capitalize on the opportunities presented by the rapid growth in Asian – North American trade and is scheduled to open in early 2011.

The Melford Advantage – Melford International Terminal Inc. will be the closest deep-water terminal in mainland North America to Europe and the Suez. The terminal will employ state-of-the-art technology, modern labour rules, innovative intermodal options and emerging security measures in one of the lowest-cost environments in North America. The geography, ice-free deep-water and the availability of thousands of acres of industrial land which can be developed adjacent to the terminal provides a unique and unmatched opportunity.
